- Integrated advanced product filtering and optimized the checkout process

Popular Store

🔗 <https://www.thepopularstore.com/>

I built a custom Shopify store using Liquid, HTML, CSS, and JavaScript. I focused on creating a seamless eCommerce experience by implementing custom theme development, advanced product filtering, and optimized checkout processes. My work included integrating third-party apps, enhancing store performance, and delivering a responsive, user-friendly interface.

Hemp Acres

🔗 <https://www.hempacresusa.com/>

I built a custom Shopify store using Liquid, HTML, CSS, and JavaScript. I integrated third-party apps, optimized performance, and enhanced the user experience with advanced product filtering and a streamlined checkout process.

Colmants

🔗 <https://www.colmants.com/>

I built a custom Shopify store using Liquid, HTML, CSS, and JavaScript. I focused on creating a visually appealing and responsive design for showcasing diverse fish products. My work included updating the color scheme, adding new sections, integrating third-party apps, and optimizing the store's performance to enhance user experience and drive conversions.
